Experience

Cognifyz Technologies

Data Analyst Intern

MAY 2024 – JUNE 2024

- Enhanced raw datasets through comprehensive normalization and transformation, significantly improving processing speed and efficiency.
- Optimized SQL queries, leading to reduced processing times and boosted overall productivity.
- Cleaned spreadsheets, ensuring a robust data management platform that improved data accuracy.

AI Variant

Data Analyst Intern

FEBRUARY 2024 – AUGUST 2024

- Enhanced a suite of data visualizations that articulated trends and implemented data quality checks, ensuring dataset accuracy and reliability.
- Addressed data inconsistencies and discrepancies, leading to reduction in error rates and improved data accuracy.
- Developed and presented five interactive Tableau visualizations that highlighted key data insights.

Data Analysis Skills

Dax, Data Cleaning, Data Mining, Data Analysis, Data Analytics, Dashboard Creation

Technical Tools

Excel, Power BI, Tableau, MySQL, Python

Certificates

[Data Analytics Essentials – Cisco](#)

Data Analyst – ExcelR

Education

Bachelor's of Science in Information Technology (Bsc.IT)

Nirmala Memorial Foundation of Commerce and Science College, Mumbai, Maharashtra

APRIL 2024

- Achieved an A+ grade with a CGPI of 8.25.
-

HR Analytics

- Converted raw datasets through normalization and transformation, completely reducing processing time.
- Optimized SQL queries, greatly enhancing processing speed and overall productivity.
- Cleaned and validated spreadsheets, improving data accuracy and reliability.
- Explored large datasets to uncover insights, boosting strategic decision-making, and developed visualizations that increased stakeholder engagement.

Zomato Analytics

- Utilized Excel for the ETL (Extract, Transform, Load) process to streamline data management.
- Developed interactive dashboards and responsive KPI's using Power BI to visualize key data patterns and behaviours.

Extracurricular Activities

Accenture North America

Data Analytics and Visualization Job Simulation on Forage – May 2024

- Analyzed 7 datasets to uncover content trends, providing valuable insights that informed the client's content strategy.
- Refined and modelled data to ensure precision and relevance. Boosted data integrity and usability through thorough cleaning and modelling.
- Created a comprehensive PowerPoint deck and engaging video presentation to effectively convey findings to both client and internal stakeholders.

PWC Switzerland

Power Bi job Simulation on Forage – May 2024

- Created Power BI dashboards to successfully convey KPIs and highlight gender balance issues at the executive level.
- Examined HR data to identify causes of gender imbalance, proposing solutions that strengthened diversity.
- Simplified transparency and understanding of metrics, supporting better decision-making.
